

**Biological Sampling Workshop**  
4-13 March 2011, Pohnpei, Federated States of Micronesia

Training subjects	Days
General biological sampling presentation Project presentation	4 April
Biological sampling scenarios	
Tagging projects presentation Project presentation	
Tagging projects presentation (suite) Project presentation	5 April
Tag recovery scenarios	
Conventional tag removal technique	
Tag seeding deployment	
Tag seeding removal technique	
Practical - Otoliths extraction using the saw method on medium fish heads	
Practical -Stomach, muscle, liver, gonads and dorsal spine sampling	
Practical -Otoliths extraction using the saw method on small fish	
Tag seeding presentation Project presentation	6 April
Tag seeding scenarios	
Trophic dynamics study presentation	
Practical -Otoliths extraction using the cutters method	
Practical -Otoliths extraction using the drilling method	
"BET and YFT growth and reproduction study" Project presentation	7 April
"Biological sampling review" presentation	
"Tagging project review" presentation	
Observer training preparation	

Training subjects	Days
Observer training assessment score	
BS workshop practical assessment	
"Final biological sampling assessment - closed book"	8 April
Short visit to WCPFC with Peter Flewwelling	
"Final tagging project assessment - closed book"	
Correcting and marking assessments for OBS training	
Pointing out major mistakes	
Observer training Biological sampling re-assessment	
Observer training Tagging project re-assessment	
OBS Training Feedback to SPC
